

Curan Man

Compact catheter for men, ready to use

Curan Man

Compact catheter for men, ready to use

Compact, ready-to-use catheter

The Curan Man is a practical catheter specially developed for men with bladder problems. A doctor or nurse will assess whether intermittent catheterisation with the Curan Man is suitable for you. Its compact design makes the Curan Man a unique catheter.

The Curan Man is packaged in a straight version. You can easily fold it into a compact version. This makes it easy to carry in a bag, coat or (inside) pocket. This makes the catheter suitable for use at home and on the go.

The Curan Man is easy to open thanks to the cap with extra grip. The catheter is hygienic and ready for immediate use.

"I am enjoying life to the fullest again, especially the little things."

- Daniel Martin

The main advantages

- ✓ **Compact design**
- ✓ **Ready for immediate use**
- ✓ **No splash or drip problems while opening**
- ✓ **Smooth and safe insertion thanks to smooth-polished eyelets**
- ✓ **Easy to insert and remove thanks to hydrogel coating**
- ✓ **Extra insertion comfort thanks to Blue Grip® insertion aid**
- ✓ **Leak-proof to take with you in the packaging after use**

The Curan Man is easy to insert and use. View the instruction video or order a test package:

Specifications

Type of use	Single
Type of catheter	Intermittent
Length of catheter	30 cm
Type of opening	Nelaton

Extra insertion comfort

Curan has developed the Blue Grip®, a hygienic touch-free insertion aid. This is hygienic and significantly reduces the risk of urinary tract infections. It is also practical: it makes inserting the Curan Man much easier.

Compact design

When folded, the Curan Man is compact. This makes the catheter easy to store in your coat, pocket or bag. You can take the Curan Man with you without it being noticeable. In addition, the packaging is designed and manufactured so that it does not make any noise when opening and closing.

Smooth and safe insertion thanks to smooth-polished eyelets

The Curan Man has smooth-polished eyelets, which makes insertion comfortable and safe, without irritation.

Information for professionals:

Product code	Size	Packaging	Colour code
CM12 Compact ready to use male device	CH12	Box of 30 units	○ White
CM14 Compact ready to use male device	CH14	Box of 30 units	● Green
CM16 Compact ready to use male device	CH16	Box of 30 units	● Orange

Maximum quality and safety

Curan is committed to maximum quality and safety in the development of catheters.

- The safety and performance of our catheters have been extensively tested, evaluated and documented. This ensures that you can rely on the same reliable experience every time you use them.
- In addition, our catheters are equipped with advanced technologies that reduce the risk of urinary tract infections. Our Blue Grip® insertion aid is a good example of this. This is a handy tool for men that allows a catheter to be inserted without touching it. This is more hygienic and therefore reduces the risk of infections.
- Our products are CE-marked and ISO 13485-certified, which is official recognition that we, as a manufacturer, market safe medical devices.
- Curan catheters are recyclable.

A bladder problem does not have to get in the way of an active and social life.
Curan develops catheters fitting for your lifestyle.
