

Curan Complete

The compact catheters with introducer tip for women and men

Curan Complete

Helps you feel safe and comfortable

Compact, comfortable and hygienic

The Curan Complete is a catheter with an integrated urine collection bag for when there is no toilet nearby, when there is limited mobility or when there is a need for extra hygiene, such as in the case of recurrent urinary tract infections. The Curan Complete comes in a compact version with a urine collection capacity of 1,000 ml.

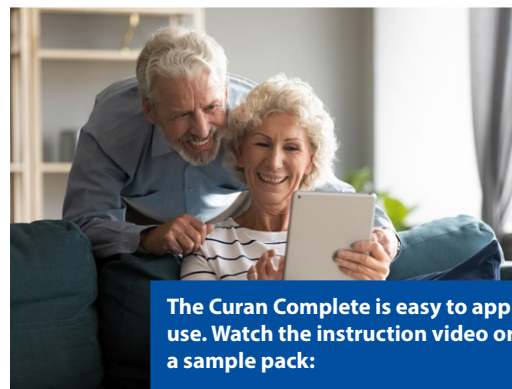

The catheter is ready to use and is packaged in 100% no-touch packaging with 'Introducer tip', a protective insertion tip. The Introducer tip is used to bypass the bacteria at the beginning of the urethra, so that these bacteria are not brought into the body with the catheter. The catheter has a comfortable hydrogel coating that remains smooth and flexible during insertion and removal of the catheter. The coating does not dry out, even if more time is needed to catheterise. The Curan Complete is suitable for both women and men.

The main advantages:

- ✓ Safe and hygienic catheterisation with Introducer tip
- ✓ Direct and smooth insertion with hydrogel coating
- ✓ Discreet 100% no-touch packaging
- ✓ Complete system with leakproof urine collection bag
- ✓ Prevents the development of recurrent urinary tract infections
- ✓ Recyclable

"The Curan Complete is easy to use and gives me more freedom."

- Hans de Vries

The Curan Complete is easy to apply and to use. Watch the instruction video or order a sample pack:

Specifications

Suitable for men	Yes
Suitable for women	Yes
Type of use	Single
Type of catheter	Intermittent
Length of catheter	40 cm
Size of collection bag	1.000 ml

Ready for use and leakproof

The Curan Complete is a closed system and immediately ready for use. The urine collection bags of the Curan Complete are individually tested and guaranteed leakproof. The catheter has a comfortable hydrogel coating and does not cause any splashing or dripping problems during use.

Safe insertion through Introducer tip

The Introducer tip prevents bacteria from being carried into the body through the urethra during insertion, helping to prevent urinary tract infections.

The comfortable packaging and hydrogel-coated catheter make catheterisation risk-free and irritation-free.

Discreet 100% no-touch packaging

With its discreet and compact packaging, you can easily carry the Curan Complete in your pocket or bag. The catheter is fully protected by the enclosed urine collection bag and is safe to use without touching it with your hands, thus ensuring 100% no-touch.

Information for professionals:

Maximum quality and safety

Curan aims for maximum quality and safety when developing its catheters. The safety and performance of our catheters has been tested, evaluated and documented extensively. That's how we guarantee the same reliable experience at any moment of use. Our products are covered by a CE Certificate and ISO13485 Certification; an official recognition that we, as a manufacturer, only place safe medical appliances on the market.

A bladder problem does not have to get in the way of an active and social life. Curan develops catheters fitting for your lifestyle.
