

Curan Lady

The catheter specially developed for women

Curan Lady

For an active and social life

Discrete, comfortable and hygienic

The Curan Lady is a compact and convenient catheter specially developed for women. Ever since the introduction, we have constantly been working on improving the user experience, based on findings and ideas gathered from both users and healthcare professionals. This has resulted in a more elegant and more discreet design of the Curan Lady than ever.

Thanks to the compact shape, the Curan Lady can be easily and discretely carried in your pocket or bag. This makes the catheter suitable for use both at home and on the road. After use, you can carry the catheter in a safe and hygienic manner in the leakproof packaging. The use of the Curan Lady therefore easily fits within your everyday life.

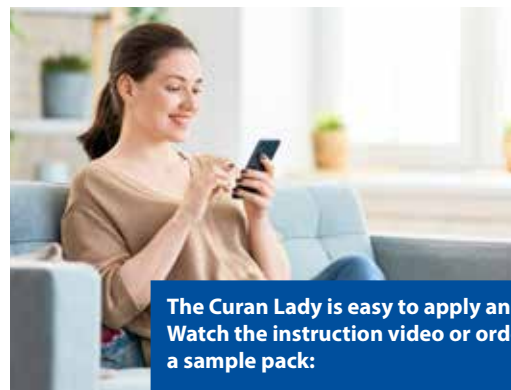

The main benefits

- ✓ **Compact and discreet design**
- ✓ **Immediately ready to use thanks to the hydrogel coating**
- ✓ **Smooth application due to the ergonomic shape**
- ✓ **Carried and disposed of discretely**
- ✓ **Can be combined with every urine drainage bag**
- ✓ **Fully recyclable**

"I live my life the same way as before the catheterisation and go out as much as I can."

- Irma Smits

The Curan Lady is easy to apply and to use. Watch the instruction video or order a sample pack:

Specifications

Total length catheter	12 cm
Type of use	Single
Type of opening	Nelaton
Type of catheter	Intermittent

Hygienic during and after use

The Curan Lady has been designed in a way that it can be closed leakproof after use. If there's no opportunity to dispose of the catheter, you can simply keep it in your bag or pocket.

Immediately ready to use thanks to hydrogel coating

You are able to use the Curan Lady directly from the packaging, after washing or disinfecting your hands.

Application without irritation and inconvenience

Thanks to the ergonomic shape, the catheter can be applied comfortably and pain-free, without any risks and irritations. The hydrogel coating increases the ease of application and does not cause any problems due to splashing or dripping while applying or removing the catheter.

Packed compact and discreet

The discrete packaging does not allow the catheter to be visible from the outside. In addition, the packaging can be opened and closed silently, to enable discreet use in public places.

Maximum quality and safety

Curan aims for maximum quality and safety when developing its catheters. The safety and performance of our catheters has been tested, evaluated and documented extensively. That's how we guarantee the same reliable experience at any moment of use. Our products are covered by a CE Certificate and ISO13485 Certification; an official recognition that we, as a manufacturer, only place safe medical appliances on the market.

A bladder problem does not have to get in the way of an active and social life. Curan develops catheters fitting for your lifestyle.
